

# Connecting iOS Devices to the CCACwireless Network

This document will detail the steps on how to connect an iPhone, iPad, iPod Touch or other iOS device to the secure CCACwireless network.

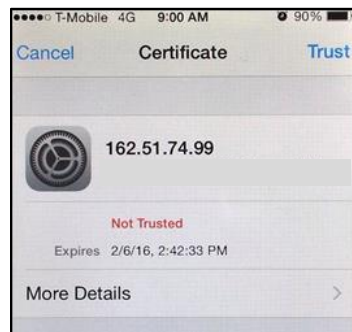

1. Open the Settings application on your device and go to Wi-Fi settings. Make sure Wi-Fi is on. Select the CCACwireless network.
2. Enter your CCAC NetID in the username field and your password in the password field. When done, tap Join.

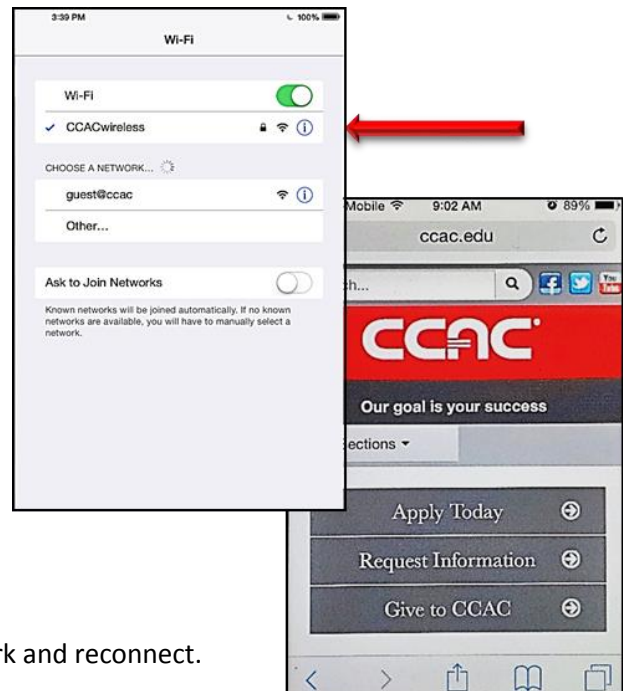

3. Click **Accept Certificate** or **Trust** to allow the device to trust the CCAC authentication server.
4. When done you will see a check mark next to the CCACwireless Wi-Fi network and you'll be connected.

iPad

iPhone

**NOTE:** If you cannot connect to CCACwireless, forget the network and reconnect.
